

Prabhanjan Padhye

Pune, India | [Email](#) • [Website](#) • [GitHub](#) • [LinkedIn](#)

Summary

Full-stack engineer with 9+ years scaling production systems across AI, ed-tech, and developer tooling. Open-source author (5,000+ GitHub stars, #1 on HackerNews) and Open-Source contributor; works comfortably across Rust/Node services, React frontends, and multi-cloud infra.

Skills

Languages: JavaScript, TypeScript, Rust, Python, Bash

Frameworks: React, Solid, Next.js, Astrojs, Axum, Tokio, FastAPI, Flask

Tools & Cloud: AWS, GCP, Docker, Podman, Postgres, MongoDB, Dgraph, Linux, Git

Experience

Lead Engineer | [reps.ai](#) 2025 - present

- Architecting the core AI-native platform from the ground up, owning system design, infra, and the engineering roadmap.
- Building and leading the team of 6 for a high impact ai product

Engineering Manager | [Bigspring](#) Nov 2022 - 2025

- Cut average API latency from 1s+ to 50ms on the platform's hot path, sustaining 8K active users per minute on a 300K-LOC Next.js / Node / GraphQL stack.
- Designed the multi-tenant infrastructure (isolation, billing, onboarding) powering enterprise deployments for Google and Pfizer; led 10+ engineers across architecture reviews, hiring, and releases.

Team Lead | [MasaiSchool](#) Mar 2020 - Nov 2022

- Built 3 core ed-tech platforms (onboarding portal, student dashboard, LMS) in React, Python, Astro, and Svelte; scaled the LMS to 2,500 concurrent students per live lecture.
- Authored technical curricula and mentored 5,000+ students in modern full-stack engineering.

Full-Stack Developer | [Growerhub](#), [Syngenta](#) Oct 2018 - Mar 2020

- Founding engineer on Syngenta's agro-tech product; shipped 2 full-stack apps with geospatial mapping and image-processing pipelines for field-level crop analytics.

Front-end Developer | [Identity and Access Government](#) Sept 2016 - Oct 2018

- Migrated a legacy enterprise suite from AngularJS v1 to React in 3 months and set up the component patterns the team continued to build on.

Key Projects & Open Source

Author | [DevTools-X](#) & [Delta](#) Open Source

- DevTools-X: Cross-platform desktop toolbox for developers built with React and Rust (Tauri); reached #1 on HackerNews and 5,000+ GitHub stars across projects.
- Delta: Multi-region file uploader and URL shortener on multi-cloud infrastructure, designed for millions of requests per second.

Contributor | [denoland/deno](#) TypeScript/JavaScript Runtime

- Fixed `URLSearchParams.toString()` to match browser behavior, added [cargo-deny](#) CI integration, and contributed [zsh completion docs](#).

60+ additional projects (CLIs, libraries, experiments) at [github.com/fosslife](#).
